

# LET'S STEAM

1. Remove the lid and add purified water to the the 5ml line (about 1 teaspoon). Pour water into the center of the steamer.

2. Place your Pixie Cup stem-side-up on the inner platform of the steamer. Replace the cover.

3. Plug in the steamer. If the light is not on, press the button to start steaming your cup. Be careful, it gets very hot.

4. After a few minutes, the steamer will power off automatically when the water is gone.

5. When the steamer light turns off, the high temperature steam is still working, and is very hot. To give your cup maximum sterilization, leave the Pixie Cup inside with the cover on for 10 minutes before removing your cup.

6. Make sure the steamer is completely dry before storing it away.

## IMPORTANT:

The button can only be pushed once per cycle. It is a one-way safety button that will automatically pop back out after the steamer has returned to a safe temperature. If the button gets pushed while the steamer is unplugged -- or if the button will NOT push -- add 5ml water (1 teaspoon), plug in, and let the steamer run until button pops out.

# ABOUT

Welcome to the Pixie Cup family! The Pixie Cup Steamer is about to become your favorite new gadget and here's why:

- It cleans your cup in 3 minutes (say goodbye to hours of intense scrubbing).
- It disinfects better than boiling water (kills 99.9% of gross germs).
- It's BPA-free! No chemicals here!

We are family owned, and based right in the heart of the midwest in a town called Springfield, Missouri!

We are passionate about empowering others, giving back, and living free, and we do this through our Buy One Give One Program! You buy a cup and we give one away! We won't rest until we get a Pixie Cup in the hand of EVERY woman in need.

# NOTES

When the steamer automatically turns off, the button will NOT pop back out until it cools down.

Please wait 10 minutes before next use in order to give the steamer time to return to a safe temperature.

Only use the steamer on a stable, dry, and heat-resistant platform, such as a table or countertop.

The steamer must have water in it to work. Do not turn it on without water inside it.

Do not submerge the steamer in water. Store the steamer in a cool, dry place.

Your Pixie Cup Steamer is backed by a two-year manufacturer warranty upon purchase. Scan the code to register your steamer.
